Tamouh Launches Sale of Horizon Towers' Residential Units at Cityscape Abu Dhabi 2015

Reem Island's Master Developer Launches Sale of City of Lights' iconic Horizon Towers

Abu Dhabi-UAE: 19 April, 2015– Reem Island's master developer, Tamouh, unveils the launch of City of Lights' Horizon Towers at Cityscape Abu Dhabi 2015, which will be held from April 21st to the 23rd, at Abu Dhabi National Exhibition Centre (ADNEC).

As part of the launch, Abu Dhabi residents will now have the chance to buy properties in Horizon Towers. With the successful development of Marina Square's community and the recent handover of several towers within City of Lights, Reem Island is becoming a much sought-after destination in Abu Dhabi, and is the number one searched for real estate development on propertyfinder.ae.

Horizon Towers, City of Lights' newest addition, offer a captivating lifestyle within the premium development, residing on a waterfront, with access to a promenade. Overlooking the marina and natural green mangroves, the towers offer panoramic views of the Abu Dhabi city and the Reem Island skyline. Comprising two buildings, the development features residential units ranging from 1 to 3 bedroom apartments, and a wide array of amenities including retail outlets, restaurants, swimming pool, boutique spa, paddle tennis, kids club, gym, fitness centre and yoga terrace. The towers' expected completion date is announced to be by the end of December 2016.

Joe Ong, Managing Director, Tamouh said: "Through the experience we gained from 2005 to this date, Tamouh now stands on many years of profound knowledge of the Abu Dhabi residents' real estate preferences. The credibility and trust we have earned over the decade has generated considerable interest from buyers, especially after we announced the gradual launch of City of Lights, as well as the progress and handover of its first phase."

Commencing with the gradual delivery within City of Lights, Tamouh recently handed over the first phase of Hydra Avenue, comprising three multi-use towers. City of Lights is a 144-acre mixed-use development on Reem Island, characterised by interlinked plazas. It encompasses 60 towers, including 52 upscale residential towers, 8 commercial towers, mixed-use development blocks, and retail blocks with podium space and facilities including swimming and wading pools, children's playgrounds, promenade, mosques, parks, marina facility, day care centre and amphitheatre.
